

COURSE INFORMATION: Tactical Performance Pistol and Tactical Performance Carbine with low light sessions.

DATE: 25-28 march 2013

LOCATION: Kent Police Dept. Range Kent, WA

INSTRUCTOR: FRANK PROCTOR

I have served over 18 years in the military, the last 11 of those in US Army Special Forces. Over the last 7 years I have trained DOD personnel in Combat Marksmanship, Close Quarters Battle, Breaching and Sniper/Observer Operations in addition to deployments to Afghanistan and Iraq. During my Special Forces Career I have had the privilege to serve with and learn from many experienced and knowledgeable Special Forces Operators, I have learned from their combined years of knowledge and experience as well as my own to help me become a better operator. After a couple years as an instructor for the Special Forces Advanced Urban Combat Course, I was drawn to competitive shooting in May of 2007. My passion for shooting helped earn the rank of Grand Master in Limited division in a little over a year. I also hold a Master ranking in IDPA Stock Service Pistol. I have learned a great deal from shooting in competition that has helped me become a better tactical shooter. I bring my experiences as a Special Forces Operator, Competitive Shooter and Instructor to my courses. All those experiences combine to make me a well-rounded shooter and instructor capable of helping you achieve your goals of becoming a better shooter. My brand of shooting is performance oriented. My thoughts on that are; whether in competition or combat, the guy who scores the most points fastest wins. My courses are based off a proven methodology of understanding the Fundamentals and Principles of Performance Marksmanship, efficient techniques to manipulate the guns and move and perhaps most importantly, how to see fast. I look forward to training with you and giving you the tools to reach your goals as a shooter.

25 March: Tactical Performance Carbine

This course will be focused on running the Carbine fast and accurate at CQB distances 5-15 yards, both static and while moving.

Topics covered but not limited to:

Fundamentals and Principles of Performance Marksmanship applied to the Carbine

Weapons manipulation (reloads, clearing malfunctions)

Multiple target transitions

Various methods of aiming.

Efficient movement techniques and shooting while moving

Night session will cover equipment set up and employment

Use of white light for target identification.

Day and night sessions will involve culmination events to tie everything together.

Time: 9am-6pm

Class size: 6

Cost: \$200 per student
